My First Blogpost:

Hello, my name is ÆLĪĀŠ, also known as Elias of IX, this does not say of X, it says of IX (planet from Dune), yes, I like Dune yes, I am a nerd.

My interests:
-Gaming
-Watching Movies
-Design and Architecture
-Literature (specifically Nietzsche)

I am still in school, I have no work, but I am learning to program, in the meanwhile, while I am not capable of programming right now, I am very good at prompting, infact, my entire website aelias.co was written by a combination of ChatGPT, Claude and DeepSeek R1.

Projects:
I am currently working on improving my website, as well as building a browser based, very simplified second brain app, which allows you to use it by only needing your keyboard, this is a maximum efficiency approach, I was inspired to do this by @yacineMTB who inspired me to do a lot of things in general, because he tries to make things as simple as possible, for example with Dingboard, meme editing software that I like to use myself.

Tech I use:
-MacBook air m3 with 16GB ram 1TB memory
-iPhone 15 Pro
-Oura Ring 4
-Gaming PC (I9-13900KF, 4090, 128gb Ram, I use this a lot for llms also)
-Fujifilm X-S20 for filming
-Pentax ME Super for analog photography (I like this one a lot)
-Ipad pro for school

Software I use:
-Brave Browser
-Ghostty
-NVIM
-Mullvad VPN

Anyways, this isn't supposed to be too much, this is my first blogpost. I will try to do one every day, if I won't, I will rarely write them.

Goodbye
